## Objective

Seeking to leverage my skills and passion for problem-solving to contribute to innovative projects and advance my professional growth in a dynamic and collaborative environment.

## Experience

### **Software Developer Intern** Jan 2024 – June 2024

SugboDoc Technologies Inc.

*As an intern, I was given a series of training activities, including creating a chatbot using a third-party large language model (LLM), implementing a clinic tracker using the Google Maps API, and containerizing the built application using Docker, followed by deployment on Amazon Web Services (AWS). Additionally, I was tasked with integrating unstructured data into an existing database, for which I utilized Python.*

### **Web Developer Intern** Feb 2023 – July 2023

Bureau of Fire Protection Region VII Office

*I developed a local web system to manage the records of certificates for the Bureau of Fire Protection. For this project, I used the Laravel framework for the development of the system and MySQL as the database.*

## Education

### **Asian College of Technology – International Educational Foundation**

Bachelor of Science in Information Technology

2020 – 2024

### **Asian College of Technology – International Educational Foundation**

Technical-Vocational Livelihood – Information Communication

Technology

2018 – 2020

## Skills

### **Programming Languages**

Javascript, HTML, CSS,  
Typescript, PHP, C#,
